Dr. Homer E. Newell
Associate Administrator for Space
Science and Applications
NASA Headquarters
Code SL
Washington, D. C. 20546

Dear Dr. Newell:

I have one item that should have been added to my letter of 1 March: Since the death of Korolev, the originator and leader of the Russian space program, in January 1966, Dr. Keldysh, President of the Academy, has increasingly taken an interest in the scientific aspects of the Russian space program.

Sincerely yours,

A handwritten signature in cursive script, reading "Gerard P. Kuiper", is written over the typed name.

Gerard P. Kuiper
